

- ✓..The plastic seat is produced by high quality copolymer P.P moulded by injection
- ✓..The seat is resistant to fire and complies with TSE EN 13501 E standards.
- ✓..UV and Anti-oxidant additives have been used in order to make the seat more resistant to the external factors.
- ✓..It has special design to prevent any “finger traps” and orthopaedic seating feature, which is comfortable for both the back and legs.
- ✓..There is oval numbering place on backrest of the seat.
- ✓..In order to extend the life of the product, 7 cm diameter polyamide mechanism is used on both sides to prevent the friction between moving parts of backrest and seat.
- ✓..The automatic folding system is concealed inside the plastic caps to provide spectator safety
- ✓..25x2 cm steel frame. Metal bar is used to tip up when seat is not in use.
- ✓..Surface of metal frame is sandblasted and undercoated before epoxy paint is applied.
- ✓..Assembly is made on 3 points to the step after placing dowels on drilled holes with M8 screws.
- ✓..The seat has vandal-proof construction, resistant to breakage.
